Dombivli gets OASIS

■ Divya Rajgopal

DOMBIVLI is in the spotlight yet again! The reputed Om hospital has started Om Advanced Surgical and Intensive Services Super-spe-

cialty Center (OASIS). The Center that will be inaugurated on June 6, also boasts of a laminar airflow system, first of its kind in the Thane district.

Come June 6, OASIS will be an integral part of Om hospital.
Santosh Shinde

cialty Center (OASIS).

Equipped with stainless steel pre-fabricated and pre-engineered modular operation theatre, OASIS will specialise in supra major operations like rheumatic surgery, plastic surgery, etc that were till date unheard of in the suburbs.

The state of art equipment at OASIS makes it a completely sterile operation theatre. Till date such hi-tech equipments were used only in renowned hospitals like Breach Candy

tal, which is known for its ISO 9001:2000 certificate.

Spread over 3,000 sq ft, 35-bedded Om hospital came into existence way in December 2000 thanks to Dr Sharad Dhaktode and his wife Dr Vandana Dhaktode, who always wanted medical facilities in the suburbs to be at par with Mumbai.

"We want to give the very best to the residents of our suburbs," concludes Dr Sharad Dhaktode.
